## Summary

B.Tech CSE graduate (2026, CGPA: 7.6) specializing in Full Stack Development with React, Node.js, MongoDB, and FastAPI. Experienced in building and deploying production-grade applications with JWT authentication, RESTful API design, Docker containerization, and CI/CD pipelines. Passionate about writing clean, scalable code and ready to contribute from day one.

## Experience

### -Web Development Intern

Jun 2024 – Jul 2024

CODTECH IT Solutions

Remote

- Designed and delivered a fully functional **e-commerce website** with product listing, cart, and checkout flow using HTML, CSS, and JavaScript — submitted on time within a fixed project deadline.
- Built a **task management (To-Do) application** with add, edit, delete, and mark-complete functionality using vanilla JavaScript, demonstrating DOM manipulation and local state management.
- Wrote clean, structured code across both projects with consistent UI/UX and cross-browser compatibility.

### -Web Developer Intern

July 2026 – Present

Myra's Global Tech

On-Site

- Contributing to the design and development of **client-facing web applications**, collaborating with the development team.
- Implementing responsive UI components and integrating them with existing project workflows, ensuring consistency with company coding standards and design guidelines.
- Participating in code reviews, debugging, and testing to maintain code quality and cross-browser compatibility across ongoing company projects.

## Projects

### Chapters & Co. — Full Stack E-Commerce Bookstore

github.com/Pritam7847/Chapters-Co-bookStore

- Engineered a full-stack bookstore using React, Node.js/Express.js, and MongoDB with MVC architecture; backend API achieved **3.58ms average response time** and **100% success rate** across 158 requests under k6 load testing.
- Implemented JWT-based authentication securing 3 user roles (guest, customer, admin) with session-persistent cart management across login/logout cycles.
- Architected RESTful endpoints for product catalog, cart, and order workflows; deployed on Vercel with continuous deployment on push to main.

### AvsarPath — AI Career Recommendation System

avsar-path.vercel.app

- Developed an AI-powered career recommendation engine using React (TypeScript) as Frontend and Python/FastAPI as Backend; achieved **p95 response time of 16.09ms** and **100% success rate** across 300 requests under k6 load testing.
- Containerized with Docker ensuring consistent behavior across dev and production environments; deployed publicly on Vercel.
- Designed API to analyze structured user input and return ranked career path suggestions with supporting rationale.

### ideaVault — Collaborative Idea Platform

github.com/Pritam7847/ideaVault-pritam

- Built a real-time idea submission and review platform using React, Node.js/Express.js, and MongoDB; sustained **0% failure rate** across **750 requests** (p95: 134ms, p99: 191ms) under k6 load testing.
- Implemented instant comment and reaction system without page reloads; structured RESTful endpoints for idea submission, retrieval, and review workflows.
